- Windows

Projects

Development of a Java Spring Boot-Based Job Portal.
Developed a job portal application using Java Spring Boot, MongoDB, Swagger, and React, designed to connect job seekers with employers. The application focuses on adding job postings by employers and enabling job seekers to search for jobs effectively.

E-commerce anime website(Frontend)
Developed a visually appealing and user-friendly e-commerce website dedicated to anime merchandise. Designed and implemented the frontend using HTML and CSS to create an intuitive layout, engaging product displays, and responsive design for seamless user experience across different devices. Ensured cross-browser compatibility and optimized loading times for better performance.
